## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 8 is objected to because of the following informalities: it appears that the limitations recited in claim 8 is redundant. This subject matter has already been incorporated within claim 1. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 6-8 and 10-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Lehmann (U.S. patent number 5,353,916).

Lehmann discloses a method and apparatus for controlling articles (5) within a continuous flow from at least one incoming feeder track (7) into at least one outgoing feeder track (8) comprising at least one shifting unit (3) for controlled shifting of the flow into one or more selectable paths of the outgoing feeder track (8) wherein the shifting unit (3) is provided with means for controlling the speeds of the articles (5), while maintaining the continuous flow

Art Unit: 3651

of the articles (5) without arresting the continuous flow, for separation of the units in the longitudinal direction of flow where the separation enables the controlled shifting.

Lehmann also discloses the means for controlling the speeds of the articles (5) by controlling the constant acceleration of the articles (5) on the outgoing feeder track (8), up to a speed exceeding the speed of the flow within the incoming track (7) whereby the separation of the articles (5) occurs within the shifting unit (3) area (see figure 1).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lehmann (U.S. patent number 5,353,916).

Lehmann as disclosed above, fails to show a variable speed feeding conveyor.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the incoming feeder track of Lehmann's invention with that of a variable speed feeding conveyor, in order to provide for a variation of distances between the

Art Unit: 3651

articles being spaced apart from one another, depending on the needs of the user of this conveying system.

***Response to Arguments***

6. Applicant's arguments with respect to claims 6-11 have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

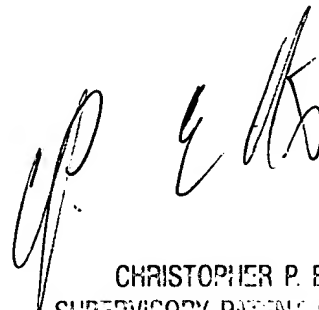

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
